Summary

Senior Flutter engineer with 5+ years building and releasing cross-platform iOS and Android apps in Flutter and Dart, including 16 production apps in logistics, e-commerce, food ordering, digital health and connectivity. Skilled in Clean Architecture, BLoC, Provider and Riverpod, payment, POS and NFC integrations, CI/CD and App Store and Play Store releases, with backend experience in Spring Boot and Node.js (Express). Portfolio: syed-waleed-shah.github.io

Experience

Senior Software Engineer (Mobile App) **05/2026 – Present**
VentureDive | Karachi, Pakistan

- Build cross-platform iOS and Android apps in Flutter and Dart using Clean Architecture and BLoC state management.
- Implement authentication with AWS Cognito (phone OTP, social sign-in, Sign in with Apple) and Apple Pay payments, integrating REST APIs and validating them against Swagger/OpenAPI specs.
- Deliver pixel-accurate UI from Figma designs and manage releases end to end: TestFlight, code signing, and App Store and Play Store submission and compliance.
- Provide production support through bug triage and issue resolution, working in Git, Bitbucket and Jira.
- Use AI-assisted development with Claude Code, building custom commands and skills for commits, UI audits and bug triage.

Senior Flutter Developer **09/2024 – 05/2026**
Zip24 | Karachi, Pakistan

- Contributed to 7 production Flutter apps for iOS and Android on the Shipox delivery platform, including rider and customer apps and white-label builds for Uzbekistan Post (UzPost), Thabit and Continental Courier, using Provider and Riverpod.
- Enhanced route-management algorithms in the Shipox Rider app, increasing delivery efficiency by 25%.
- Built parcel tracking for the UzPost customer app, and driver-app features for parcel delivery and management that improved efficiency by 40%.
- Developed Storfox app features for warehouse management, inventory, supply control and stock control.
- Built REST APIs with Node.js, Express and TypeScript.
- Improved project delivery times by 30%.

Senior Flutter Developer **04/2023 – 09/2024**
Chikoo (Brandverse) | Karachi, Pakistan

- Developed 6 Flutter apps: the Chikoo e-commerce store builder, TapShop, and 4 white-label restaurant ordering apps (Roll Inn, Ox and Grill, The NewYork Pizza, Chargha Town), using Provider and Riverpod.
- Delivered 8 core features of the Chikoo app before the deadline.
- Built automation scripts for app white-labelling, reducing new app creation time to minutes.
- Set up the CI/CD pipeline in Codemagic, automating iOS and Android builds and speeding up releases.
- Integrated Stripe, PayPro and PayFast alongside ChikooPay, expanding payment partners from 1 to 4.
- Integrated the apps with 5 types of POS machines and implemented NFC, Tap to Pay and Swipe Card payments through Kotlin and Swift platform channels, growing transactions through these methods by 10%.

Full Stack Developer (Flutter & Spring Boot) **04/2021 – 04/2023**
Sofstica Solutions | Karachi, Pakistan

- Developed and launched 3 Flutter apps (Routica, iKeepr, C-Screener) within deadline using BLoC, with a GitHub Actions CI/CD pipeline that significantly reduced deployment time.
- Built Routica, an RV companion app that configures Explorer I routers, streamlining router setup and connectivity, along with the Spring Boot (Java) REST APIs behind it.
- Integrated WebSockets in the iKeepr digital health app for real-time status updates, enabling faster response during emergencies.
- Wrote unit and integration tests that sped up development and caught bugs before releases reached testers.

- Refactored legacy code, reducing codebase size by 25% while maintaining functionality and improving performance.

Skills

Languages: Dart, TypeScript, Java, Kotlin and Swift (platform channels), Python, SQL

Mobile: Flutter, iOS, Android, cross-platform development, Apple Pay and Stripe payments, NFC and POS integration, TestFlight, code signing, App Store and Play Store releases, secure storage (Keychain/Keystore), SSL certificate pinning, code obfuscation

Architecture & State Management: Clean Architecture, BLoC, Provider, Riverpod

Backend: Spring Boot, Node.js, Express, Flask, REST APIs, WebSockets, Swagger/OpenAPI, PostgreSQL, MySQL

Cloud & DevOps: AWS Cognito, Firebase (FCM, Crashlytics, Analytics, Firestore, Auth), CI/CD with Codemagic, GitHub Actions and Fastlane

Testing: flutter_test (unit and widget tests), integration_test, Mockito, Mocktail, JUnit, Postman

Tools: Git, GitHub, Bitbucket, Jira, Figma, Xcode, Android Studio, Claude Code (AI-assisted development)

Data & ML: Python, pandas, NumPy, scikit-learn

Education

Master's in Data Science **01/2024 – 07/2026**
NED University of Engineering and Technology | *Karachi, Pakistan*

Bachelor's in Software Engineering **01/2017 – 12/2021**
Karachi Institute of Economics and Technology | *Karachi, Pakistan*

Open Source

rename_app: Flutter package that changes an app's display name on every platform, with sound null safety.
pub.dev/packages/rename_app | github.com/Syed-Waleed-Shah/rename_app

infinite_scroll: Flutter package with InfiniteScrollList and InfiniteScrollGrid widgets for infinite-scrolling lists and grids, with API calls during loading.
pub.dev/packages/infinite_scroll | github.com/Syed-Waleed-Shah/infinite_scroll
